FIOCRUZ
Fundação Oswaldo Cruz

1. Introduction

2. Day 1 – Monday 27 July

3. Day 2 – Tuesday 28 July

4. Day 3 – Wednesday 29 July

Identified need to share experiences to improve understanding of medicine utilisation in Africa

- There is an identified need to stimulate cross-national research in Africa to enhance the rational use of medicines
- This includes learning as well as groups working and publishing together on common research topics
- This was the philosophy behind the programme – starting with workshops for both people new to drug utilisation research as well as those more actively involved in various situations. You are free to move between the groups for different topics
- Your feedback as well as participation in future projects is essential – hence why we would urge you all to complete the feedback form and the MURIA Registration form when available during the conference

**First Training workshop and symposium MURIA Group 27 – 29 July 2015
University of Botswana, Gaborone, Botswana**
