

Introduction to the workshop on designing and undertaking national and cross national studies

Second MURIA meeting

Prepared by Brian Godman

Advanced Group – Designing and undertaking DU studies – Aims (Auditorium 2)

- The aims of this alternative workshop on Monday afternoon is to provide attendees with case histories regarding challenges and opportunities with undertaking national and cross national studies to enhance the appropriate use of medicines
- This includes the different challenges with using patient level data as opposed to aggregated DU data when undertaking both national and cross national studies
- Learnings include how to undertake national and cross national DU studies within countries
